D4 who are we?

J&C Joel is one of the world's leading manufacturers of flame retardant fabrics and flooring, drapes and shapes and stage engineering solutions for the entertainment and live event industries.

Established in 1978 by John Wheelwright, the business initially focussed on selling fabric to tailors and the fashion industry. But John soon identified a new opportunity in the entertainment industry and the business started manufacturing Black Wool Serge – a commodity product used for theatrical drapes, stage masking and acoustic curtains – which became the fabric backbone of the business.

A new era dawned in 2006 when John's son, James Wheelwright, took over the business marking the start of a major period of growth – the biggest in the company's history – with offices opening in the Middle East, Hong Kong, South Africa, Macau and Vietnam plus an expansion of operations in Europe and Australasia.

The business now exports to more than 80 countries worldwide, providing products and services such as Front of House theatre drapes, stage backdrops, cycloramas, gauzes, acoustic solutions, projection screens plus an array of stage engineering solutions.

1986

The company expands it's ranges to explore wide width fabrics.

Fabrics & Flooring

J&C Joel are one of the world's leading manufacturers and suppliers of flame retardant fabrics and flooring designed specifically for the technical requirements of the event and entertainment industries.

We offer a comprehensive range of quality fabrics and flooring, most with a variety of colours to choose from or the ability to be custom dyed to your specification. Our products comply with a range of worldwide flame retardancy standards including British, French and German these are also accompanied by technical data sheets and tailored data packs providing the necessary supporting information.

From the company's wool manufacturing heritage our Wool Serge products are firmly recognised as industry staples which are complimented by our luxurious range of velvets, wide width fabrics up to 12m, the latest in scenic and event fabrics, canvases which can be painted using our range of Rosco paints and a variety of entertainment flooring.

We stock tens of thousands of metres of fabric throughout our global offices and we offer a free A4 sample service which can be ordered through our website or one of our global offices with samples despatched around the world daily.

We have a dedicated Research and Development department who are always looking out for the next innovative product to ensure we are providing the latest fabric and flooring technology to our customers. If you can't see something in our extensive catalogue, then our experienced and knowledgeable team can source it for you.

Drapes & Shapes

J&C Joel go beyond the manufacture and supply of fabrics and flooring. We design, manufacture and install a whole range of drapes and shapes that feature in a wide spectrum of theatres, venues and ceremonies around the world.

J&C Joel's extensive range of velvets are synonymous with Front of House drapes in world famous theatres. As experts in traditional decorative techniques such as appliqué, fringing and embroidery we can recreate the beautiful drapery of the opulent theatres of yesteryear right through to manufacturing modern designs for the latest contemporary venues.

Drapes and shapes are made using numerous fabrics from the J&C Joel range. From masking and blackout to cycloramas, gauzes and event drapery, we can manufacture the drape or shape that best suits your application.

If you're looking for something unique, we offer a range of fibre optic and LED starcloths that can be manufactured to any specification. We also have a variety of fabrics and flooring that can be digitally printed to create an impact and add a finishing touch to any event or stage.

We are proud manufacturers and guarantee quality on every level – the quality of our fabrics, our design services, our manufacturing process and service capabilities. Our talented team are experts at turning fabrics into drapes and bespoke shapes; they can manufacture to your specification and create amazing solutions to provide the inspiration behind any performance.

Whatever your vision, we can make it a reality.

Stage Engineering

J&C Joel is a global company with a world class Projects department that designs, manufactures and installs a wide range of stage machinery for all manner of performance venues from national theatres to school halls.

Our team of designers, project managers and engineers combine their knowledge with industry experience to specialise in custom rigging solutions, manual and powered flying systems, lifting systems which can all be operated using our bespoke controls to provide a turnkey solution for any setting.

With expertise in all areas of fabrics, drapery and stage mechanics, J&C Joel are leaders in acoustic solutions. From acoustic drapery to our range of mechanical acoustic solutions, such as roller banners, acoustic shells and concertina banners, our products can provide a solution that ensures the acoustics in your venue enhance any performance. Our acoustic solutions are all supported by the latest acoustic test reports and datasheets.

The safety of our customers is paramount at J&C Joel and we are accredited members of a range of industry organisations. Our trained engineers are qualified to install our products to industry standards and comply with governing bodies worldwide.

From designing the mechanics to make drapes fly off stage to heavy engineering solutions that operate an entire theatre, our solutions are always tailored to the venue and the exact specification required. Everything we do ensures your performance always takes centre stage.

Tracks & Drapery Systems

The manufacture of large scale drapery is at the heart of our business and we provide a complete engineering solution to make them perform as required. Our systems work seamlessly to create different movement types; lowering, raising and retracting some of the largest, most intricate drapes in venues around the world.

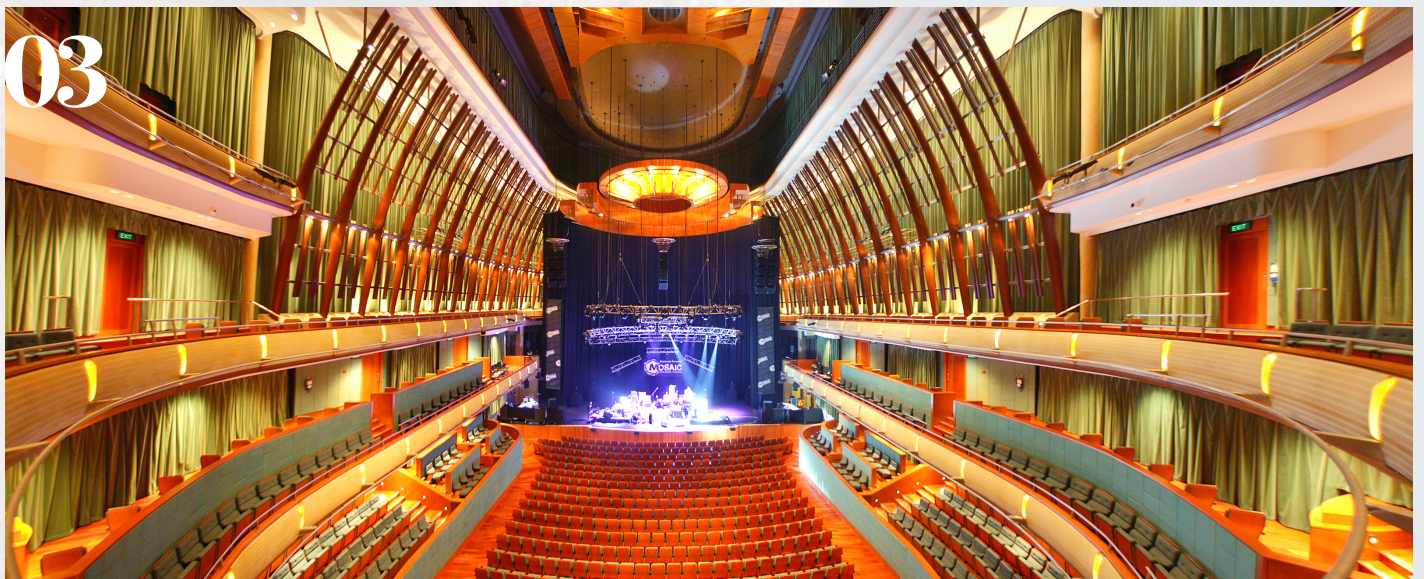

J&C Joel offer a selection of manual and motorised tracking systems to suit all types of drapes. We supply and install the industry leading brands such as Triple E, Silent Gliss and Goelst.

We have a selection of walk-along, corded or motorised systems which can be manufactured straight, curved and even custom shaped. These are then matched to the drape size, weight and action required to ensure it is perfect for the required application.

As well as tracks we also offer a Drape Retraction Unit which when combined with our Kabuki Systems creates a real touch of magic by quite literally 'retracting' a drape off the stage in seconds.

As drapery experts our experienced team will advise the best track or drapery system for your drape and purpose, from a school blackout window drape to the world's leading Opera Houses. Our job is to make sure the drapery's performance is perfect from the moment the curtain rises to the second the curtain falls.

Whatever your vision, we can make it a reality.

when would you require our services?

From the Village Hall to the Olympic Village...

There is no job too big or small for our expert team.

why use J&C Joel?

J&C Joel is an award winning global business with strategically placed facilities to ensure our customers can access a turnkey solution for any project, anywhere in the world; no matter how big or small.

The company now has more sales and technical staff on the ground than ever before; this means we have the world covered with offices on four continents allowing the company to be operational almost 24 hours a day. This ensures we can provide bespoke quotations, design, manufacturing and installation services anywhere on the globe.

In today's fast paced world where decisions are made with little or no time to react our global business allows us to react quicker than most due to having warehousing and manufacturing facilities around the world. We pride ourselves on providing a fast, cost effective and unsurpassed service whilst ensuring we maintain the highest standards.

Our talented team of sales representatives, designers and project managers will work with you to advise on fabrics and help create a drape, shape or stage engineering solution that is perfectly suited to your exact requirements.

We have over 200 years of collective fabric and drapery knowledge at J&C Joel; so, when choosing your fabric any questions about colour, construction and technical ability can be answered by our team. If a bespoke solution is required, we will conduct our own research and development to deliver the very best solution to fit your request. And if we don't have it, our Research and Development team will find it.

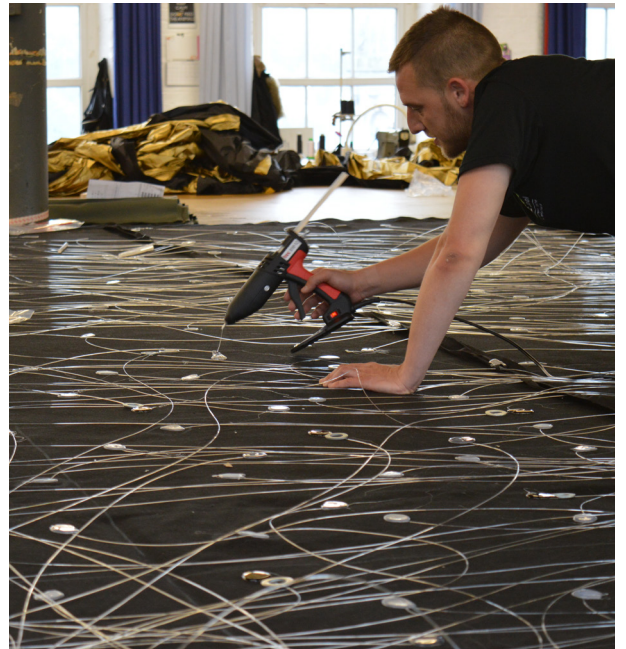

Within our worldwide facilities we have a highly skilled manufacturing team who can produce everything from a Front of House drape to complex appliqué, embroidery and creative drapes and shapes.

We can also work with you to turn your vision into reality by creating concept designs using the latest computer aided design software to produce drawings and 3D renders before moving onto prototypes and testing to ensure our drapes, unique shapes and stage machinery perform perfectly when installed.

We are extremely proud that our products and services feature in projects around the world from the local Village Hall to the Olympic Village.

Above all the J&C Joel family puts our customers at the heart of everything we do. And we are proud our clients continue to be the inspiration behind our performance.
